CableSafe: Safety Hooks, Cable Safety, Confined Space Safety & Dropped Objects Prevention

Each year over 100,000 injuries and deaths are attributable to work-related falls in different industries.

Construction and maintenance

Construction and maintenance operations call for the use of industrial safety products that are not necessarily used every day on industrial sites.

Electrical Contractors

Gebruik speciale enzymen om de GI en vector te plakken en een hybride van de twee DNA-moleculen te vormen - het recombinant DNA

Manufacturing

Manufacturing safety products vary as widely as the industry. In order to keep your employees safe, manufacturing supplies must be sourced from trusted, reputable sources.

Marine and offshore

In marine and offshore, people tend to work in small workspaces on water. Especially there a safe work environment is crucial.

Mining

The mining industry is notorious for extreme workplace hazards. For this reason, innovations in mine safety are of the utmost importance.

Oil Well/Oilfield Companies

Facilities in the oil and gas industry are notorious for potential workplace hazards. For this reason, there is a large demand for safety equipment.

Petrochemical Companies and Oil Refineries

Petrochemical companies are large multinationals with extremely rigorous safety standards, as instituted by law in most countries.

BUILDING AN ENDURING CULTURE OF SAFETY

Building an enduring culture of safety can be the most cost-effective and proven accident prevention process.
